Focal point:	<p><i>Isabelle Maelcamp</i> Isabelle.maelcamp@asd-europe.org</p> <p><i>Mobile phone : +32 470 82 3767</i></p>
Description:	<p>Industry representatives will outline how industry plays an important role in the international defence trade.</p> <p>What is “industry” and how does it function? How does industry comply with export control regulations and laws, and how does it contribute to combating diversion? How can industry-government cooperation support ATT implementation, and what are the limits of industry’s role?</p> <p>Composed of 17 major companies and 23 national industry associations, ASD is Europe’s leading aeronautics, security, space, and defence industry association. Join us and a civil society colleague for a discussion addressing the role and contributions of industry as a responsible stakeholder in the ATT process.</p>
